

Mutahhar BM - Product Engineer

mutahharbinmuzaffar@gmail.com | +92 301 2498730 | linkedin.com/in/mutahhar-bin-muzaffar | github.com/bmutahhar

Summary

Product Engineer with 5+ years of full-stack experience shipping user-facing features across AI-assisted experiences, SaaS, and eCommerce. Builds with React, TypeScript, Node.js, PostgreSQL, and AWS while owning delivery from architecture through production rollout.

Experience

Senior Software Engineer

ImagineArt - Vyro.ai

Jul 2023 – Present

Islamabad, Pakistan

- Led **Workflows** from ideation to MVP as a founding engineer, defining a unified React Flow canvas for text, image, and video generation.
- Expanded team execution by onboarding and mentoring 4–5 engineers and setting implementation direction for complex real-time node orchestration.
- Improved release consistency by establishing Git-based team workflows and maintaining a Vercel deployment pipeline for microfrontend releases across independently deployed modules.
- Improved rollout speed by 60% and reduced access-update overhead by 35% by implementing Firebase Remote Config feature gating, contributing to 20% subscription growth.
- Partnered with product and design stakeholders to scope complex features into clear delivery milestones.

Full Stack Developer

Engiselle

Mar 2022 – Mar 2025

Singapore

- Increased transaction volume by **20%** by delivering production eCommerce platforms for online pharmacy and home-repair workflows.
- Improved production reliability by deploying backend services on AWS EC2, managing PostgreSQL on Amazon RDS, and configuring S3 bucket policies with IAM-based team access controls.
- Improved backend data consistency by owning PostgreSQL query flows and implementing ORM layers with Sequelize and Prisma across eCommerce and LMS products.
- Increased user engagement by **35%** by implementing real-time event notification workflows with Socket.io.
- Built AI-assisted voice and avatar learning interactions in a Next.js LMS by integrating Azure AI Speech text-to-speech and real-time avatar synthesis.

Software Engineer

DevsInc

Jun 2022 – Jun 2023

Islamabad, Pakistan

- Built and shipped a healthcare provider dashboard using React, Material UI, scheduling workflows, and Twilio video integrations.
- Improved API flexibility by implementing and consuming GraphQL queries and mutations across a React frontend and NestJS backend on the VeVe project.
- Improved release confidence and regression safety by implementing frontend unit tests with Jest and React Testing Library on the Kudo project.
- Improved dashboard UX and query performance, reducing load time by **40%** and accelerating feature releases by **20%**.

Software Engineer

Pakistan Air Force

Oct 2021 – Jun 2022

Islamabad, Pakistan

- Conducted 10+ feasibility studies in an R&D team and developed geospatial interfaces with Mapbox; deployed 20+ Docker images on local Kubernetes, reducing deployment time by **50%** while supporting **99.9%** uptime.

Education

Bachelor of Computer Science

COMSATS University, Islamabad

2021

CGPA: 3.73/4.00

Skills

Languages: JavaScript, TypeScript, HTML, CSS/SCSS

Frontend: React, Next.js, Tailwind CSS, ShadCN, Radix UI, Redux, Zustand

Backend/Data/Infra: Node.js, Express.js, NestJS, GraphQL, PostgreSQL, Prisma, Sequelize, Firebase, AWS (EC2,

RDS, S3, IAM), Socket.io, Docker, Kubernetes, Strapi CMS

Quality/Delivery: Jest, React Testing Library, Git, CI/CD (Vercel), Microfrontend Delivery, Performance Optimization, Scalable UI Patterns, REST APIs

Achievement

Received the Bar Riser Award at Vyro in 2025 for contributions and sustained effort.
