

Mutahhar Bin Muzaffar - Senior Software Engineer

mutahharbinmuzaffar@gmail.com | +92 301 2498730 | linkedin.com/in/mutahhar-bin-muzaffar | github.com/bmutahhar

Summary

Senior Software Engineer with 5+ years of experience building scalable web products with JavaScript, TypeScript, React, and Next.js, owning architecture and cross-functional delivery while improving performance, reliability, and release velocity.

Experience

Senior Software Engineer

ImagineArt - Vyro.ai

Jul 2023 – Present

Islamabad, Pakistan

- Founding engineer for **Workflows**; led delivery from ideation to MVP launch and defined architecture for a unified React Flow canvas across text, image, and video generation.
- Scaled Workflows execution after launch by onboarding and mentoring a team of 4–5 engineers, establishing implementation direction for complex real-time node orchestration.
- Built subscription-based feature gating with Firebase Remote Config for real-time rollouts, improving rollout efficiency by 60% and reducing access update overhead by 35%, contributing to 20% subscription growth.
- Took end-to-end ownership and delivered the company's blog section using Next.js and Strapi CMS, enabling a scalable and maintainable content publishing workflow.
- Partnered with product and design stakeholders to scope and sequence complex features into predictable delivery milestones.

Full Stack Developer

Engiselle

Mar 2022 – Mar 2025

Singapore

- Delivered production eCommerce products, including an online pharmacy and home-repair platform, increasing transaction volume by **20%**.
- Implemented real-time event notification workflows with Socket.io, increasing user engagement by **35%**.
- Added image annotation and ANPR webhook pipelines, improving support-case accuracy and resolution speed.

Software Engineer

DevsInc

Jun 2022 – Jun 2023

Islamabad, Pakistan

- Built and shipped a healthcare provider dashboard using React, Material UI, scheduling workflows, and Twilio video integrations.
- Improved dashboard UX and query performance, reducing load time by **40%** and accelerating feature releases by **20%**.
- Resolved 50+ production issues and improved marketplace UX with React and TypeScript, reducing support tickets by **30%**.

Software Engineer

Pakistan Air Force

Oct 2021 – Jun 2022

Islamabad, Pakistan

- Conducted 10+ feasibility studies in an R&D team and developed geospatial interfaces with Mapbox; deployed 20+ Docker images on local Kubernetes, reducing deployment time by **50%** while supporting **99.9%** uptime.

Education

Bachelor of Computer Science

COMSATS University, Islamabad

2021

CGPA: 3.73/4.00

Skills

Languages: JavaScript, TypeScript, HTML, CSS/SCSS

Frontend: React, Next.js, Tailwind CSS, ShadCN, Radix UI, Redux, Zustand

Backend/Infra: Node.js, Express.js, NestJS, Firebase, Socket.io, Docker, Kubernetes, Strapi CMS

Architecture/Tools: System Design, Frontend Architecture, Performance Optimization, Scalable UI Patterns, Jest, Git, REST APIs

Achievement

Received the Bar Riser Award at Vyro in 2025 for contributions and sustained effort.
