

Mutahhar BM - Senior Fullstack Engineer

mutahharbinmuzaffar@gmail.com | +92 301 2498730 | linkedin.com/in/mutahhar-bin-muzaffar | github.com/bmutahhar

Summary

Senior Fullstack Engineer with 5+ years of experience building production web products with TypeScript, React, Node.js, and NestJS. Delivers scalable REST and GraphQL APIs, owns frontend architecture, and ships reliable releases through Git workflows and cloud deployment pipelines.

Experience

Senior Software Engineer

Jul 2023 – Present

ImagineArt - Vyro.ai

Islamabad, Pakistan

- Product adoption increased by leading **Workflows** from ideation to MVP and architecting a unified React Flow canvas for text, image, and video generation.
- Team delivery capacity increased by onboarding and mentoring 4–5 engineers and setting implementation standards for complex real-time node orchestration.
- Rollout speed improved by 60% and access-update overhead dropped by 35% by implementing Firebase Remote Config feature gating, contributing to 20% subscription growth.
- Release consistency improved by setting Git-based team workflows and maintaining a Vercel deployment pipeline for a microfrontend architecture.
- Delivery predictability improved by partnering with product and design teams to scope high-impact work into clear engineering milestones.

Full Stack Developer

Mar 2022 – Mar 2025

Engiselle

Singapore

- Transaction volume increased by **20%** by delivering production eCommerce products for online pharmacy and home-repair marketplaces.
- Data-layer reliability improved by owning PostgreSQL-backed data models and query flows with Sequelize and Prisma for eCommerce and LMS backends.
- Production operations improved by deploying Node.js backend services on AWS EC2, managing PostgreSQL on Amazon RDS, and configuring S3 bucket policies with IAM controls.
- User engagement increased by **35%** by implementing real-time event notification workflows with Socket.io.

Software Engineer

Jun 2022 – Jun 2023

DevsInc

Islamabad, Pakistan

- API flexibility improved by implementing and consuming GraphQL queries and mutations across a React frontend and NestJS backend for VeVe.
- Care-team workflow efficiency improved by shipping healthcare dashboard features with React, Material UI, scheduling workflows, and Twilio video integrations.
- Expanded mobile workflow coverage by contributing React Native and Expo features that extended core VeVe product flows.
- Reduced load time by **40%**, accelerated release cycles by **20%**, and reduced support tickets by **30%** by improving UX architecture and resolving 50+ production issues.

Software Engineer

Oct 2021 – Jun 2022

Pakistan Air Force

Islamabad, Pakistan

- Reduced deployment time by **50%** while supporting **99.9%** uptime by conducting 10+ feasibility studies and deploying 20+ Dockerized services on Kubernetes.

Education

Bachelor of Computer Science

COMSATS University, Islamabad

2021

CGPA: 3.73/4.00

Skills

Languages: JavaScript, TypeScript, HTML, CSS/SCSS, SQL

Frontend/Mobile: React, Next.js, React Native, Expo, Tailwind CSS, ShadCN, Radix UI, Redux, Zustand

Backend/Data/Infra: Node.js, Express.js, NestJS, REST APIs, GraphQL APIs, PostgreSQL, Prisma, Sequelize, Firebase (NoSQL), AWS (EC2, RDS, S3, IAM), Socket.io, Docker, Kubernetes, Strapi CMS

Delivery/Architecture: Git, Git workflows, CI/CD pipelines (Vercel), Fullstack System Design, Frontend Architecture, Performance Optimization, Scalable UI Patterns, Cross-Functional Delivery, Jest
